

we speak data, we deliver efficiency

# Holistic Charger Management Service

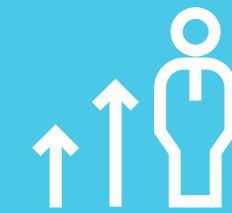

## Cost Reduction

Real-time remote handling  
and minimized human intervention

## Automation

Unattended algorithms' system  
for maximized troubleshooting

## Customization

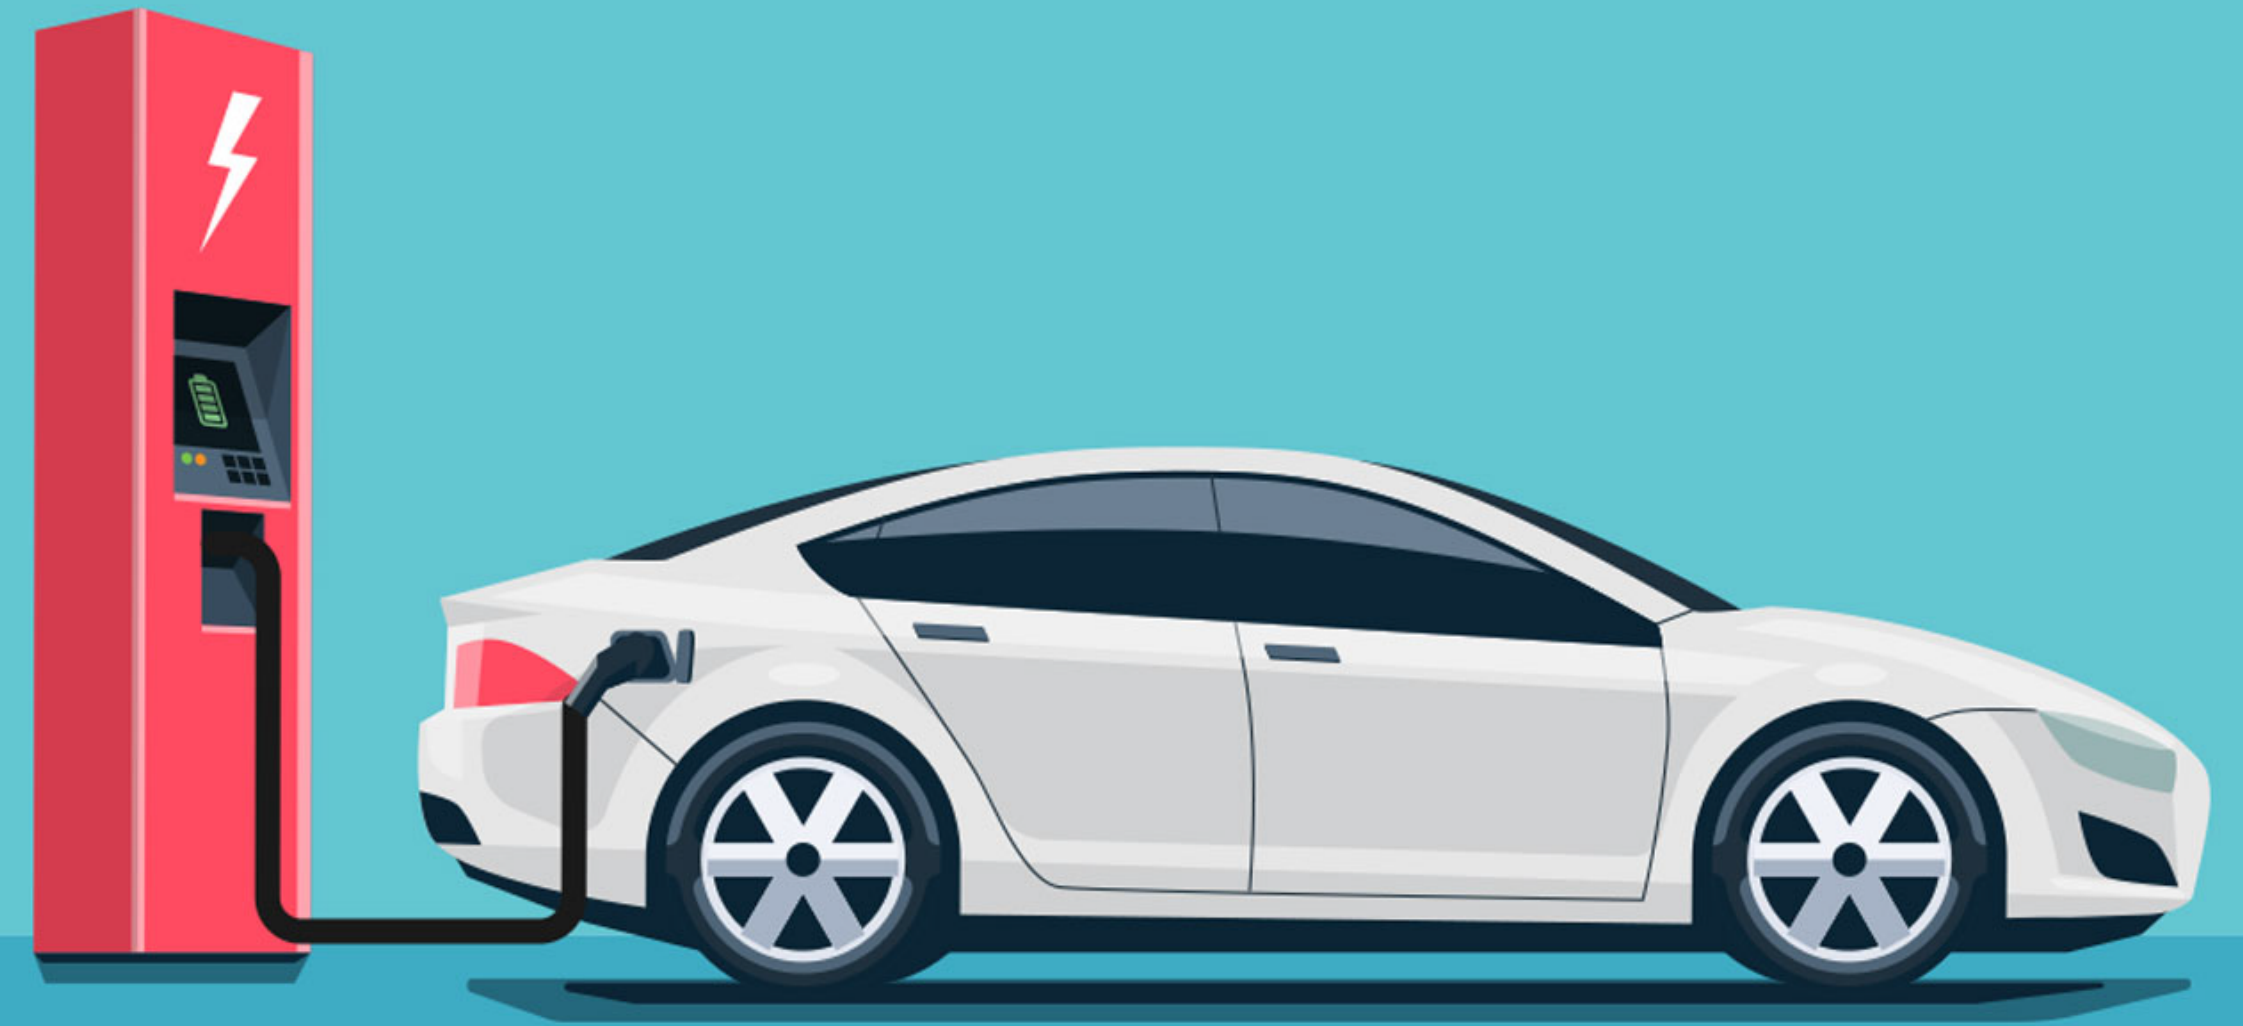

Scalable & adjustable solutions, based  
on market growth & customer needs

## Evolution

Continuous evolution and compliance of  
technology, according with the  
global EV standards

# Advanced Billing System

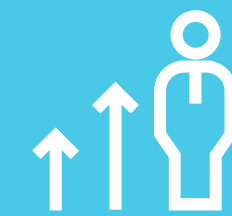

## Revenue Increase

Elimination of billing errors by using state-of -the-art processing tools

## Analysis

Targeted billing plans through data analysis insights

## Optimization

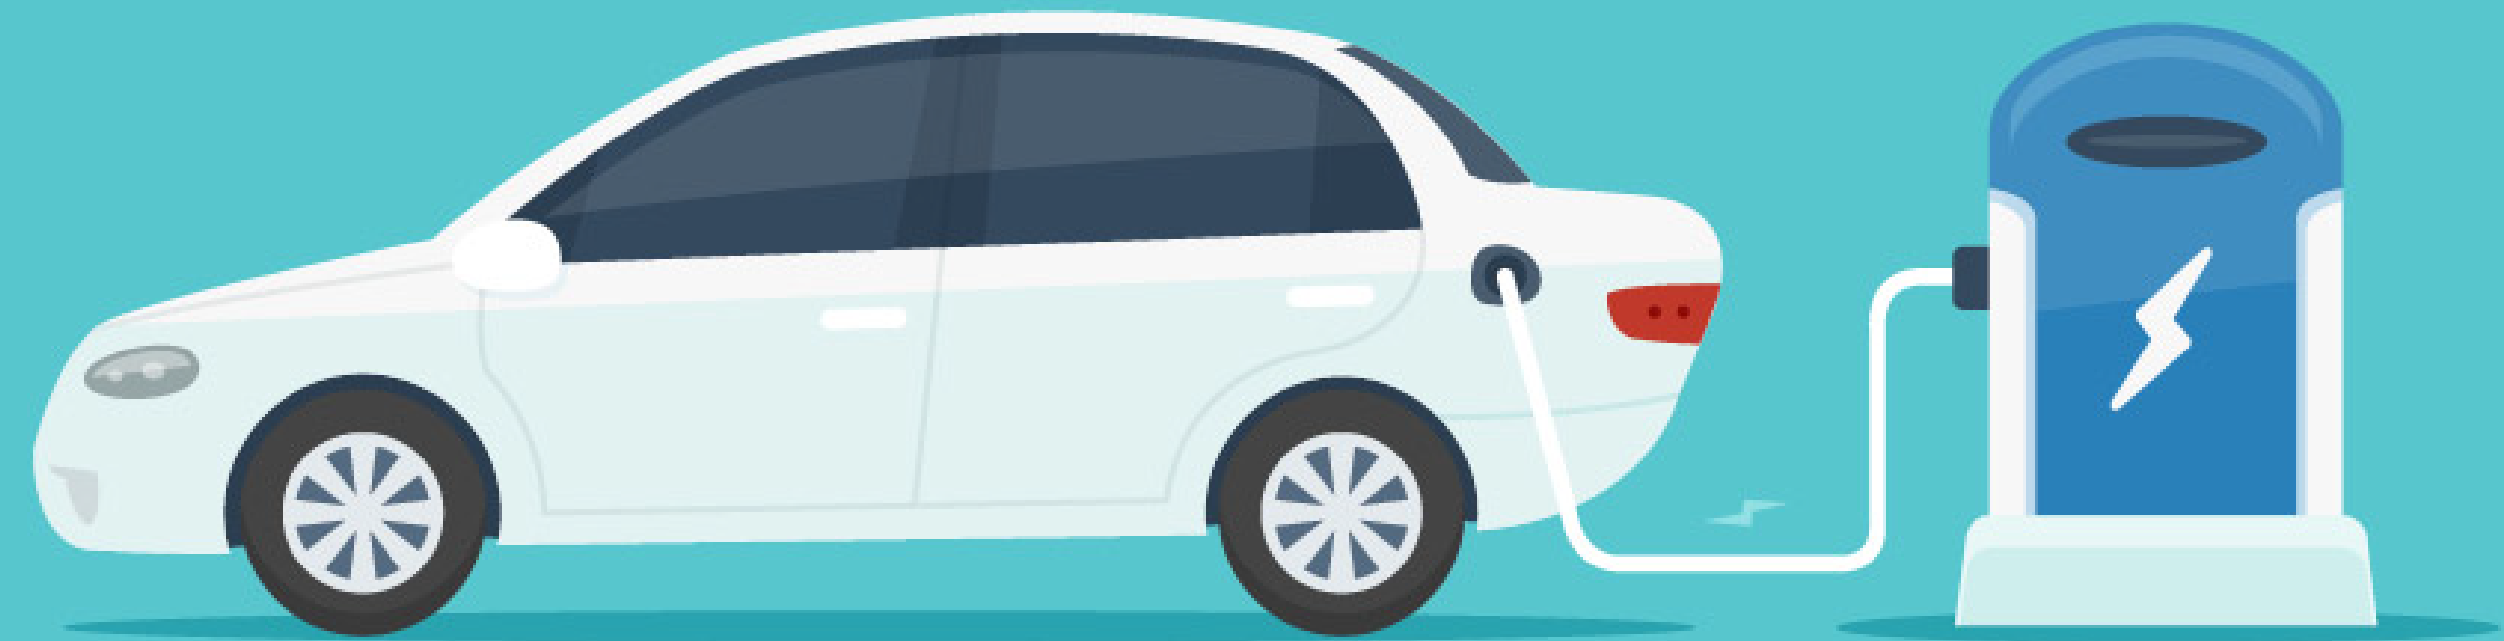

Fully customizable & versatile solutions' pricing policies

## Integration

Full integration with new or existing ERP systems

# Optimized Electrical Energy Management

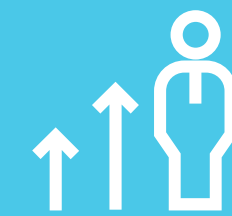

## V2G

Maximization of the available energy resources by improving energy distribution to & from the grid

## Cost Reduction

Use of specialized energy analysis & advanced management algorithms to reduce CAPEX & OPEX

## Optimization

Charging supply infrastructure optimization through more efficient distribution of available electrical power

## Evolution

Continuous integration of EV future technologies & market growth requirements

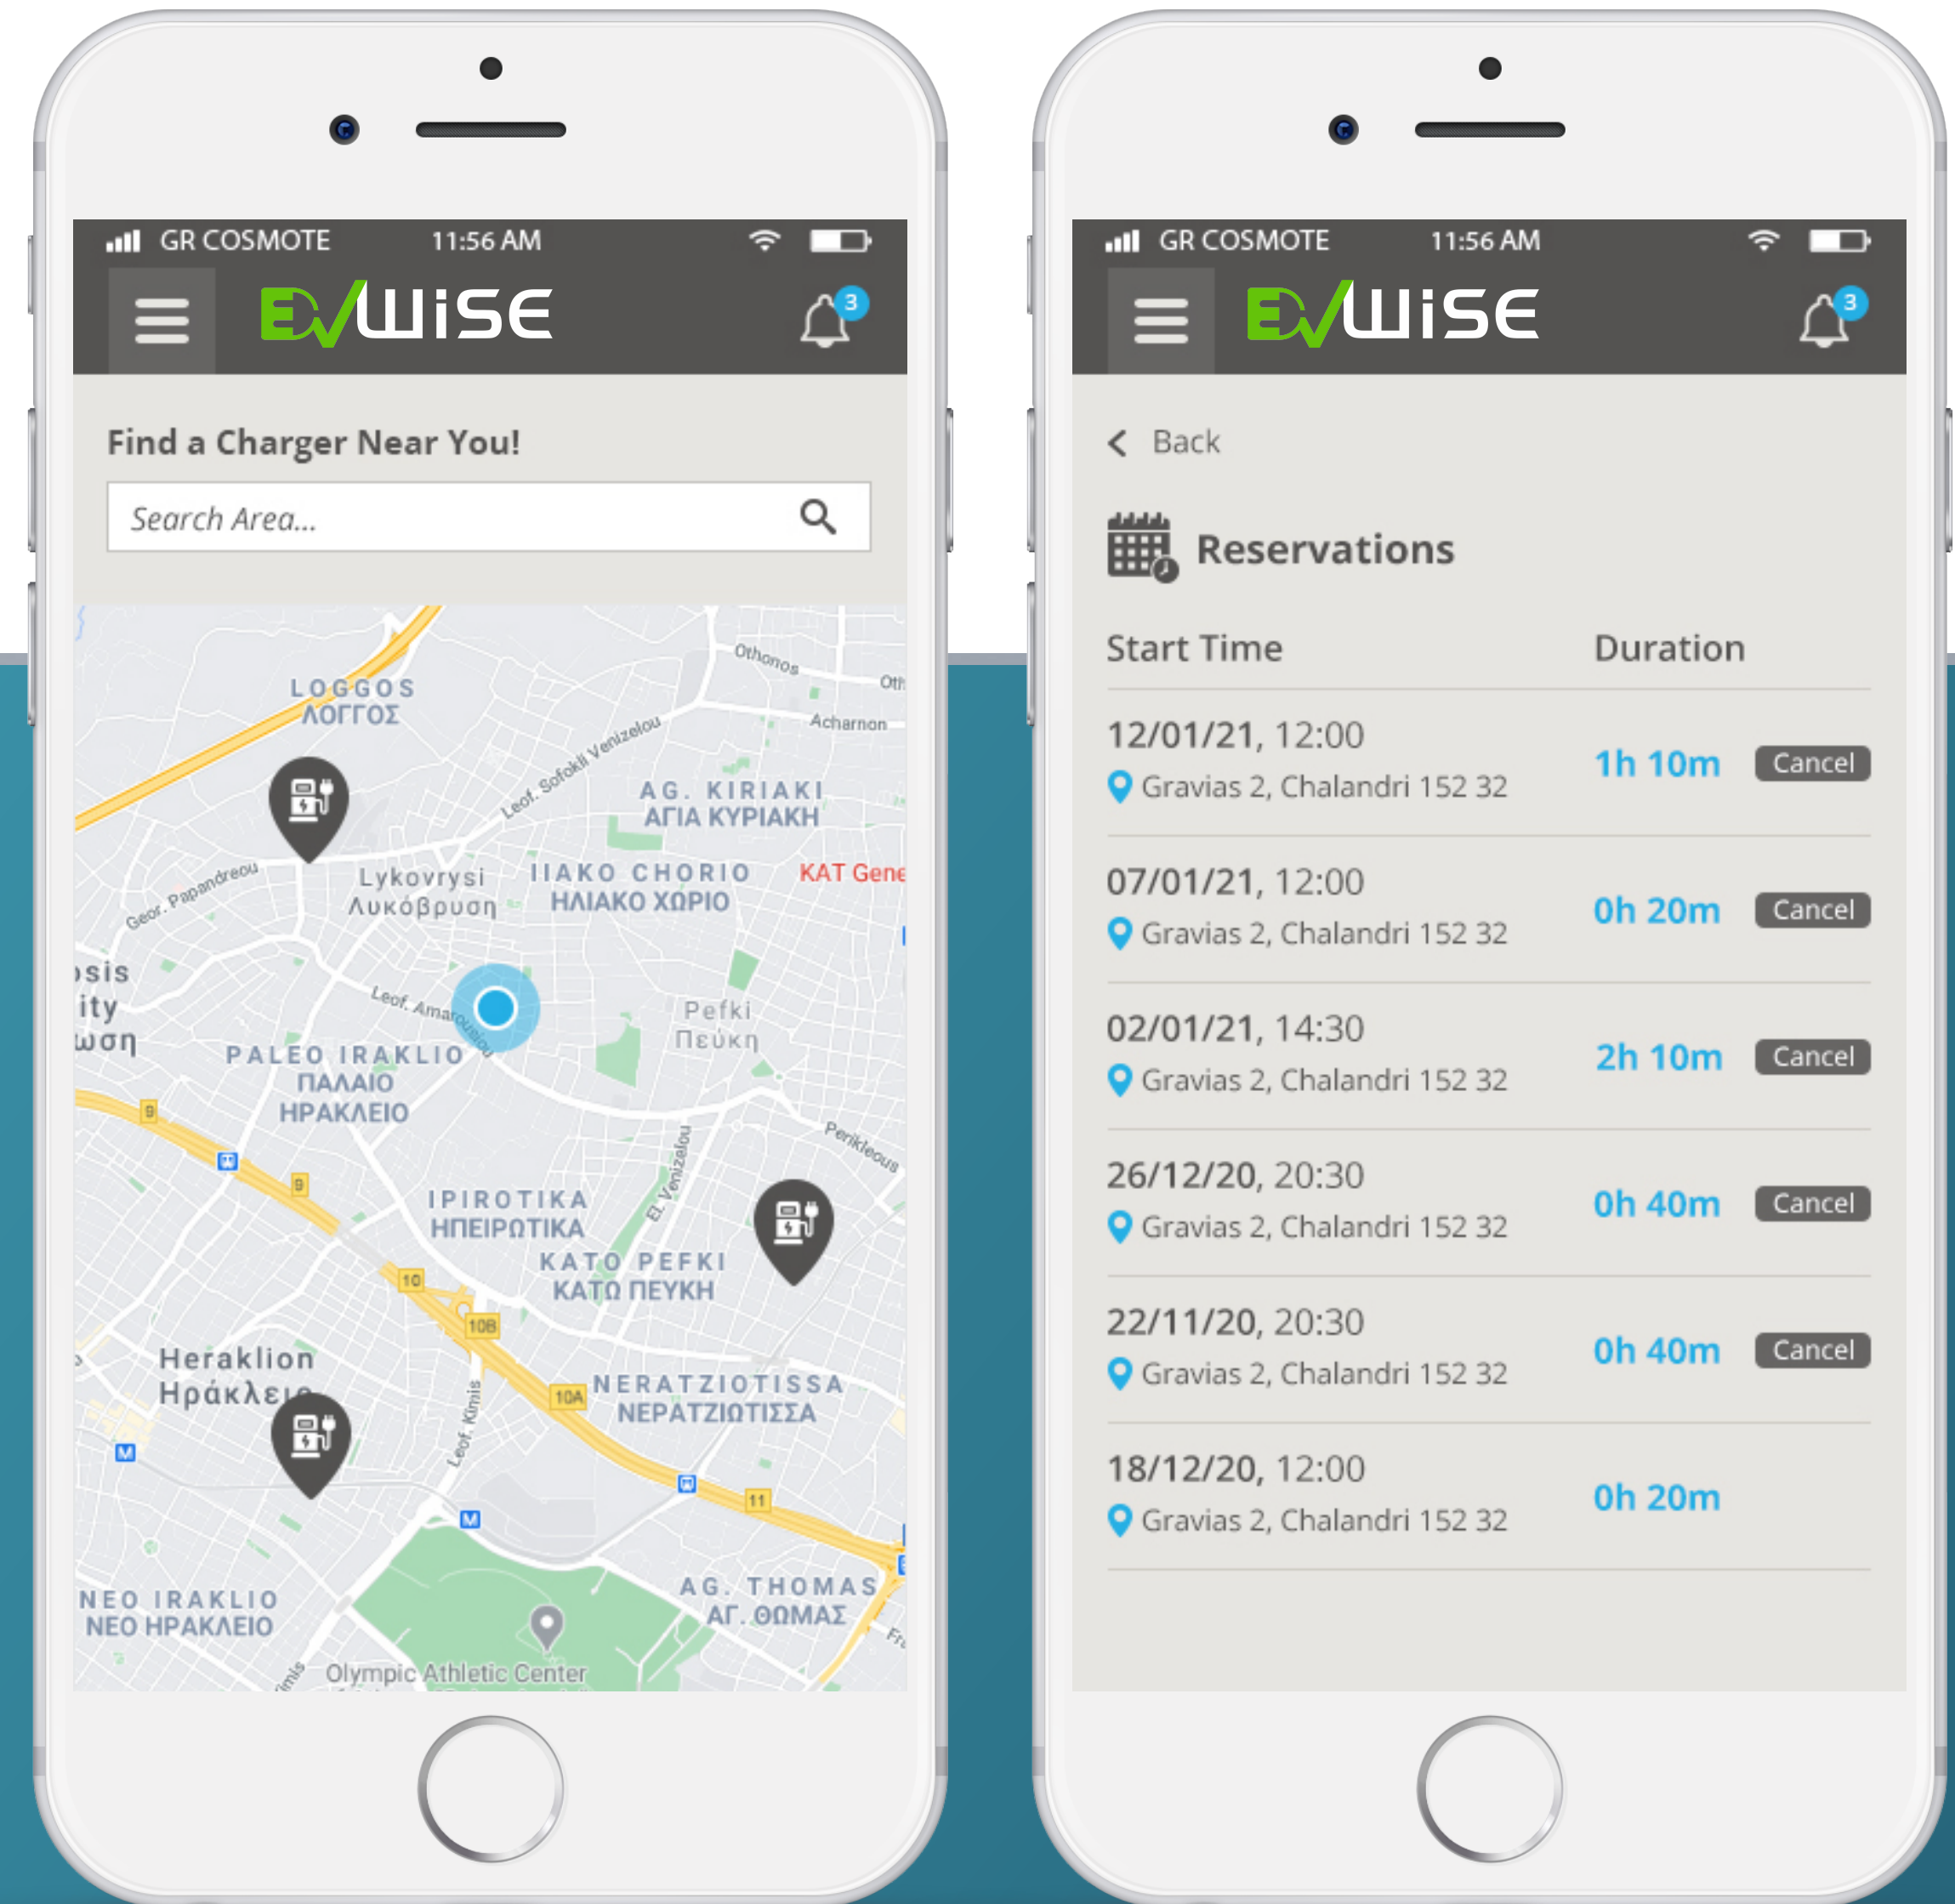

# Product Preview

# Mobile Application (1/2)

## The Optimal Drivers' Solution

Considering the ever-increasing EV drivers' needs EVWISE offers the flexible mobile app through which the latter can effortlessly manage their vehicles charging.

# Mobile Application (2/2)

## Holistic Experience

Through the mobile app EV drivers have the following potential:

Browse through an extremely user-friendly UI

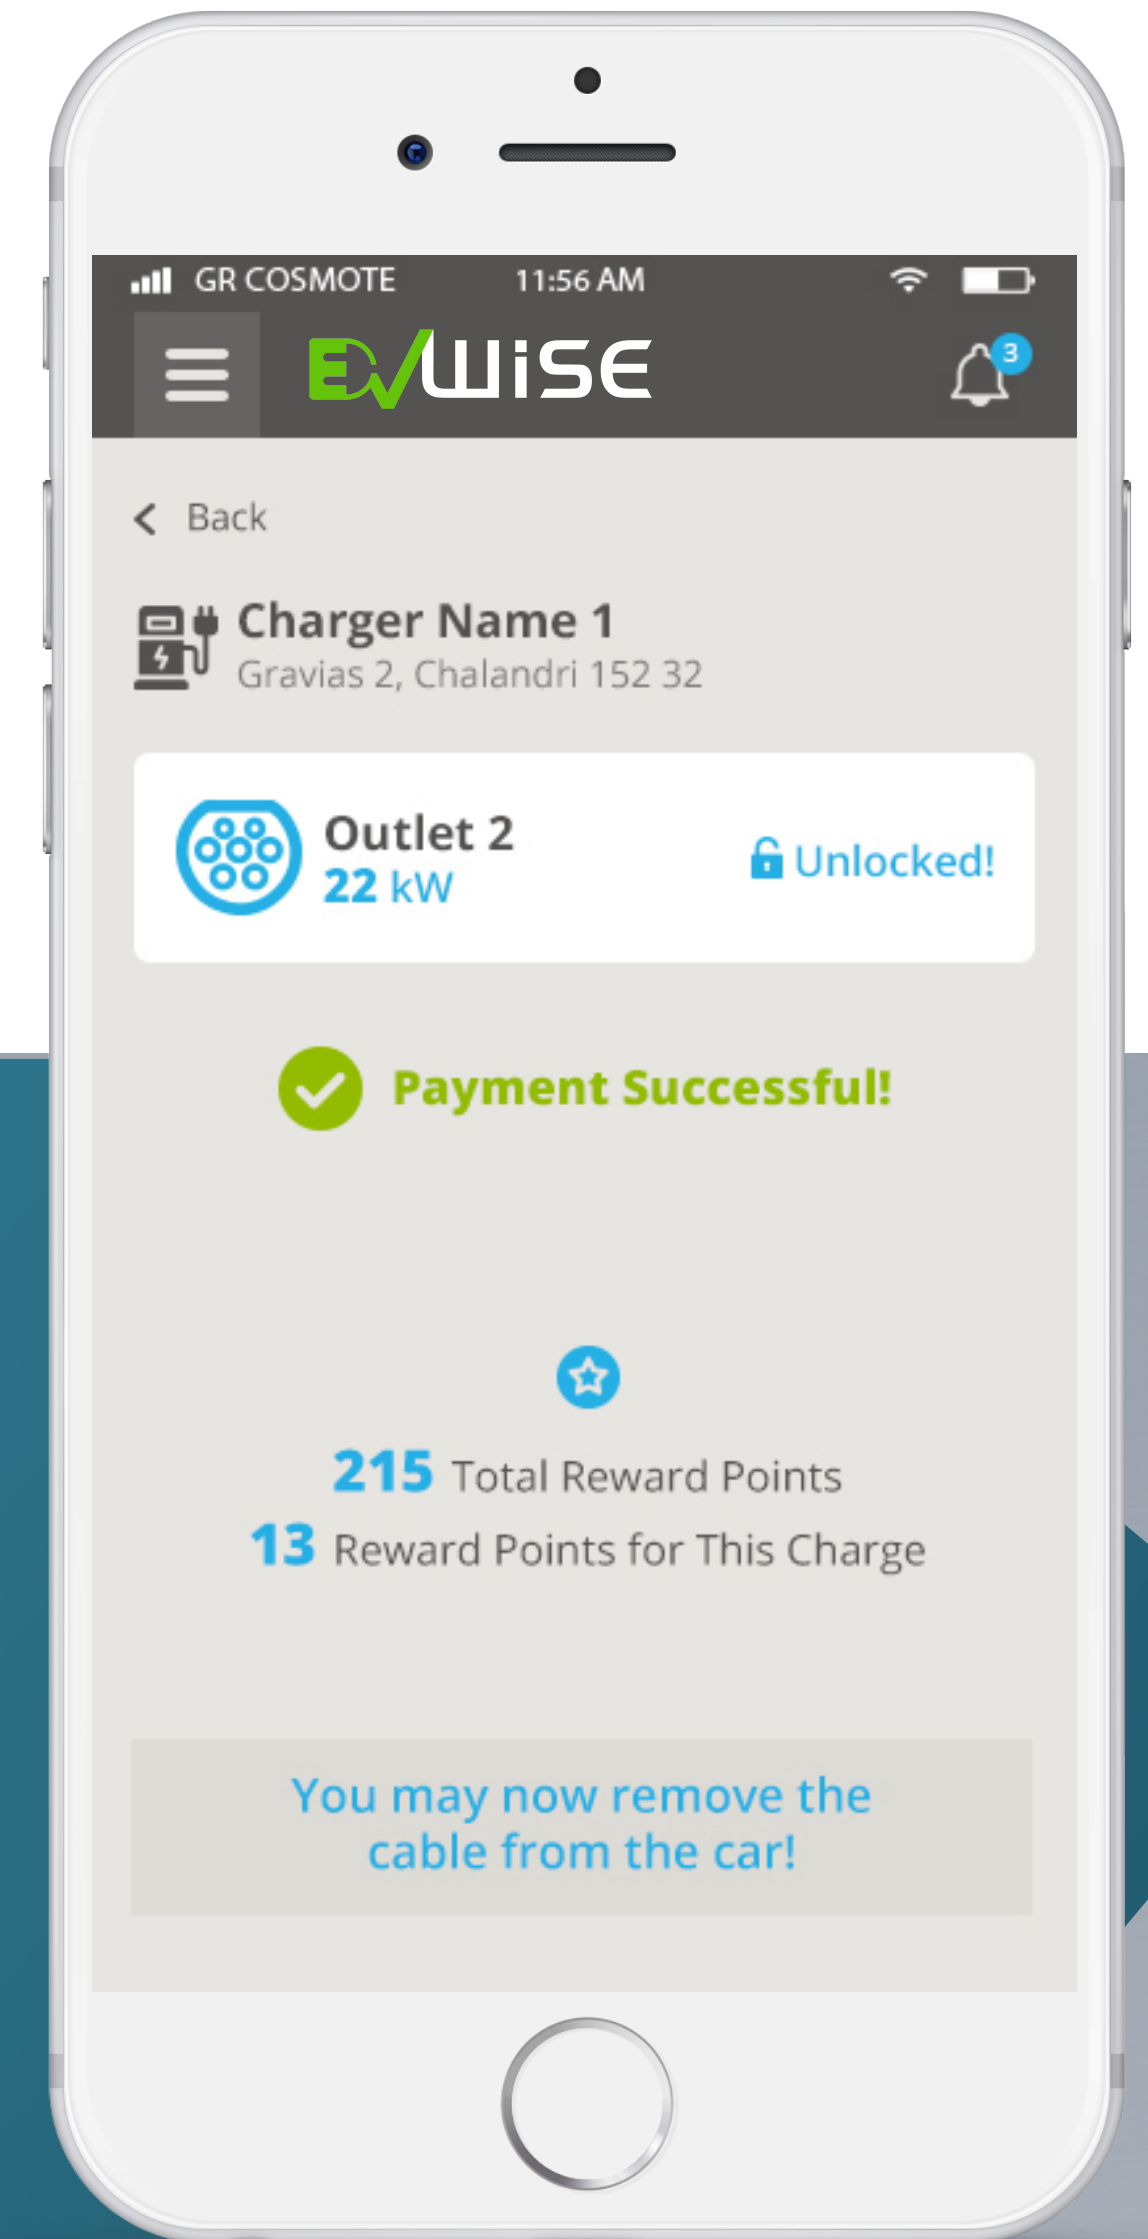

Schedule charging appointments & make payment

Access to account data (payments, invoicing)

Make use of additional features offered by the CPO

# Our Clients

we speak data, we deliver efficiency
