

dtwise

WiseWatch™

In dtwise we know how to make heavy data meaningful.

WiseWatch™ is a powerful tool and a virtual power panel, offering a bird's eye view on the whole range of your data.

It observes the whole landscape 24/7, focusing on visualization of electricity, water and gas data, consumption and bill estimation, property benchmarking and ranking, via an integrated power panel that offers the full service pack.

dtwise

Designed to provide an overview to any user, it monitors your whole operational and organizational behavior, like a valuable utility tracker and an integrated energy consultant for your premises.

With respect to all your values, WiseWatch™ is also eco-oriented and a clever sustainable development tool, filtering and monitoring your whole premises portfolio, as an insider on an all-day watch, thus re-vitalizing older facilities and maintaining the newer ones in good shape.
